And many more...

“ I recently deployed Aquarius Soft Remote Shutdown Pro and it found it offers excellent solutions to problems that all educators with computers in their classrooms face.

Additional to not only an outstanding energy conservation utility by offering scheduled shutdowns, it has other features that provide for hibernating, freezing and wake up.

My personal favorite is the freezing feature. It is most helpful when I desire students to pay attention to me and not what's "on the screen."

I highly recommend this solution to anyone with a need to totally control the learning environment. ”

Minimum System Requirements

Windows 7, Vista, XP, 2000, ME, 98 SE, NT SP 6
2.0 MB hard disk space available for software installation.

Conduct E-Lessons Effectively

With its "Freeze PC" feature, teachers can use PC Remote Shutdown to conduct computer lessons effectively.

When the teacher wants the class attention, the teacher can "freeze" all the student PCs so that the student cannot use their PCs. Once the teacher finishes speaking, the teacher can unfreeze the computers to allow the students to continue their work on the PCs.

When a PC is frozen, a transparent window will cover up the entire computer desktop so that the student cannot access the PC. The transparent window allows the teacher to check the screen just before it is being frozen.

“ Just wanted to let you know we've been using our PC Remote Shutdown software for a while now and LOVE IT. It's helped keep our tech students focused by locking the computers between practical exercises and shuts down the whole tech lab at the end of the day, saving us money on our power bills. A great investment! ”

Adam Leibler
Technical Trainer, Allen Tate Realtors

Automatically save up to \$100 per PC!

With its timer shutdown and idle shutdown feature, PC Remote Shutdown can help you to cut down your electricity by auto-shutting down your school computers when they are not in use.

Check out how much you can save by using our online Pc Energy Saving Calculator at:

“ We were so pleased with the original 100 unit purchase or Aquarius So PC Remote Shutdown, we just upgraded and purchased licenses for over 400+ computers on our college campus. The hardware and electrical savings alone make this a worthwhile investment for a very high ROI! ”

Barry Miller
Irvine Valley College

Easily Control Access to Library PCs

With PC Remote Shutdown Pro, you can now easily control how long each student can access common PCs in the library. When a student wants to access a computer, you unfreeze the PC and set the duration for the PC to be automatically frozen again.

This feature is also useful for parents to control their kids PC usage time at home.

Other useful features includes

- Manual or auto-power up your Wake-On-LAN computers
- Auto-cleanup your computers to improve performance
- Group your computers into groups for easy management
- Broadcast messages to groups of PCs

And more...
